

Delivery specification digital Ster

At this page you'll find the delivery specifications needed for digital advertising (in general, for banners and for online video). Looking for the general/selling terms and conditions, check the PDF files at the bottom of this page.

For more information, please contact digital@ster.nl

General accepted files

- 3rd party tags: HTML, Javascript
- Banners: JPG, PNG of (animated) GIF
- HTML
- Automated video play in banner is possible (audio must be user initiated)

Pre-roll (online video)

- Extension: mp4
- Length: max 36 seconds
- Frame-rate: 25 fps
- Audio standard: Full scale digital audio
- Resolution: Full HD (1920x1080)
- Please do not use any special reading sign in de name of file (for example ?/"etc.)
- As the Ster logo is placed in the player in the left corner, we advise to place the advertisers logo in the right upper corner of the video.

Please note: when the campaign is deployed within the no-consent route, the video (as mp4 file) and the URL of the landing page must be submitted separately to digital@ster.nl.

In-banner video

- Share the video in the right bannersize as MP4
- Max. 3,95 MB
- Border: 1x1 contrasting border is suggested.
- Frame rate: Minimum 14 frames-per-second (30 FPS recommended)
- Autoplay is allowed
- Max 36 seconds
- Audio: user initiated
- It's not allowed to implement any cookies
